

# X4 SPEAKER CABLES: FLAT SERIES

## FLAT SPEAKER CABLE - SEMI-SOLID CONCENTRIC PACKED CONDUCTORS

Overall: 2 x 13 AWG (2.65 mm<sup>2</sup>)

• 2 x (19 x 28 AWG) **Long-Grain Copper (LGC)**

• 2 x (7 x 26 AWG) **Long-Grain Copper (LGC)**

• Dark Gray or Off-White PVC Jacket

- (A) Multiple Strands interact electrically and mechanically, causing irritation and one-note bass boom.
- (B) "Oxygen-Free" Copper is Oxygen-Reduced, but is not selected for low distortion.
- (C) High-Inductance Geometry smears sound, reduces information.
- ① Semi-solid concentric packed conductors reduce harshness and confusion caused by strands changing position within the bundle.
- ② Long-Grain Copper means fewer impurities, less grain junctions, lower distortion.
- ③ Low-Inductance Geometry preserves time information, preserving dynamics and clarity.

TYPICAL SPEAKER CABLE	X4
<p><b>STRANDS CHANGE POSITION</b></p> <p>In a conventional cable, distortion caused by electrical and magnetic interaction are compounded as each strand changes position within the bundle.</p>	<p><b>STRANDS DO NOT CHANGE POSITION</b></p> <p>In a Semi-Solid concentric packing cable, strands within the smaller, tighter concentric bundle do not change position, significantly reducing distortion.</p>

**TERMINATION DIRECTIONS:** The 4 concentric packed conductors of X4 can be easily separated and then stripped individually. Take care not to cut the conductors when stripping off ½" (12mm) of PVC jacket. Please follow the color code indicated by the 2 color stripes.

Attach the 2 color-striped conductors to a Black (-) AudioQuest CF-Spade or CF-BFA/Banana connector. AQ CF connector packs include an Allen-key tool for tightening the 2 set-screws. Tighter is better. Attach the 2 un-striped conductors to a Red (+) connector.

If your speaker or amplifier has a screw-terminal or a binding post, you can insert the stripped ends of X4 directly. Then, screw down the connection. Tighter is better for preventing corrosion of the connection.

NOT INCLUDED - SOLD SEPARATELY
