

Multi Room Audio System Speakers

**5600 Series**

Clipsal's range of speakers are perfect for home theatre, Multi Room Audio and outdoor audio applications. Clipsal's range of in-wall and in-ceiling speakers offer users the choice of polypropylene or Kevlar® drivers, providing quality sound in all applications.

The range is designed to be installed so that the front of the speaker is flush with the wall or ceiling and the inside of the wall or ceiling acts as the enclosure. Therefore you get great sound without losing valuable floor space.

Clipsal's outdoor speakers are designed to accurately reproduce high fidelity music in an outdoor environment. With rigid, high-impact plastic cabinets, polypropylene drivers and powder coated metal grilles, the outdoor speakers are built to last through all seasons.

Although the speakers are water resistant, they are not waterproof and should not be installed outdoors where they are directly hit by rain. The best placement includes under a porch, eave or overhang.
