

C-Bus® Network Interface V2

Product update

The C-Bus Network Interface has been updated to a new version 2 product. The new version 2 is effectively a DIN rail format of the in-line C-Bus Network Interface supplied with the Wiser™ Home Controller.

The functionality of the new version 2 C-Bus Network Interface has not changed and the platform is now common across both the DIN rail format and in-line format. The new version 2 is now configured using the C-Bus IP Utility and is powered by a 6-12V d.c. plug pack.

Product Features

- New Ethernet interface
- Configure IP address using the C-Bus IP Utility software
- Provides an isolated communication path between a C-Bus and an Ethernet network
- DIN rail mounted, 4M wide
- Powered from supply voltage of 6-12V d.c.
- Includes 9V d.c. plug pack
- Can act as a programming interface into C-Bus
- Create multi-network installations based on an Ethernet backbone
- Monitor and log data using the appropriate software
- Provide C-Bus device control via automation software such as Schedule Plus or HomeGate
